

SPECIAL NEEDS

Special arrangements are made for pupils taking the entrance test who have documented special needs.

10% of extra time may be available in the Entrance Tests if a specific learning difficulty is confirmed.

In order to qualify for consideration for 10% extra time, St. Olave's would require:

- a) a recent (within the last twelve months) written assessment from an educational psychologist confirming a specific learning difficulty which would merit consideration for extra time;

and

- b) report from the current primary school indicating their awareness of the position and confirming the special need. The report must be signed by the Headteacher.

This should also include confirmation that the pupil is either statemented or on the special needs register. Please enclose this information with your Supplementary Information Form.
